Erratum

In the article Destabilization of heterologous proteins mediated by the GSK3β phosphorylation domain of the β-catenin protein. [Cell Physiol Biochem. 2013; 32:1187-1199, https://doi.org/10.1159/000354518] by Kong et al, there was an image assembly (copy/paste) error in Figure 3A, in which the image for “EGFP/+Dox” group was erroneously duplicated with an overlapping image from the “EGFP/+Dox” group of Figure 4B. This error occurred at the figure assembly stage since experiments for Figure 3 and Figure 4 were carried out at the same time, and the image files (including overlapping images) for the same treatment groups were stored in one folder. The authors state that this error does not adversely impact the conclusion of the original work. The authors apologize for any inconvenience caused by the error to the journal and scientific community.

The corrected Figure 3 is shown here.
